

MINISTERIO DE INDUSTRIA Y ENERGIA
JUNTA DE ENERGIA NUCLEAR

73
25-XI-85

Madrid, November 25, 1985

Mr. TOM McGRAW
Radiological Control Division
Office of Nuclear Safety PE-222
U.S. DEPARTMENT OF ENERGY
WASHINGTON, DC 20545

Dear Mr. McGraw:

This letter is to provide you with the current estimates for the fiscal year beginning 1 February 1986, for INDALO Project (Contract Number: DE-GI01-82EP 12126). From our last planning meeting at Los Alamos National Laboratory, on October 1-2, 1985 you know the directions of our experimental work on people, air, ve getation and soil.

Our estimation for the budget of the INDALO Project for the fiscal year February 1, 1986 to January 31, 1987, has been based on the amount of money spendend during 1985, the economical conditions in our country, the work to be made, the technical people to be engaged and the supplies which are needed. Accordingly, we are requesting to the D.O.E. 240.000 \$ (two hundred and forty thousand \$) for the fiscal year, February 1, 1986 to the January 31, 1987. Of this amount of money, approximately 130.000 \$ will be used for personnel salaries and related cost, another 50.000 \$ will be required for maintenance of equipment and supplies of seve ral types. In addition, 60.000 \$ will be required for Travel and Per Diem. The travel include the ones to be made by JEN personnel associated with the Project and the ones to be made by inhabitants of Palomares who must travel to Madrid and back for internal contama nation and medical surveys.

The report related with experimental work made during 1985 and proposal for 1985 will be send to you in some weeks.

Best personal regards.

Sincerely yours,

EMILIO IRANZO
Head of INDALO Project
